Dear Dennis:

NeoFace WideNet is a hosted service that helps law enforcement personnel expedite criminal investigations and solve cases that contain video evidence more quickly and easily. The service does this by:

- Turning poor-quality images into evidence to identify individuals by matching against mugshot repositories
- Providing easy interface through universal browser compatibility, regardless of browser preference
- Supporting multiple image and video file formats: BMP, TIFF, PGM, PNG, JPEG and J2K
- Easily integrating with existing systems and operations
- Offering high scalability and affordability for agencies of any size—small, medium or large

Best of all, NeoFace WideNet is powered by NEC's facial recognition algorithm—the industry's most accurate and fastest matching algorithm—delivering unsurpassed accuracy, matching capability and scalability.

Download your copy of our new eBook, Turn Your Images Into Evidence, to learn more.

If you have any questions about how NEC's NeoFace WideNet hosted service can help your organization, please feel free to call or reply to this message.

Best regards,

Kelly Gallagher
